
DOCUMENTATION

Electronics & Computer Technology

2017-2018

Throughout the semester, students will be required to submit items to a documentation medium that fits their needs. The goal of this ongoing process is to have evidence of learning and skills while providing a place for reflection on labs and projects. Think of this as an online/digital journal of each class period...

- INTRODUCTION TO EACH ASSIGNED LAB OR PROJECT
- LIST MAJOR OBJECTIVES OF THE ACTIVITY/PERIOD
- NECESSARY DIAGRAMS, LINKED MANUALS/DATASHEETS, FLOW CHARTS, TECHNICAL DOCUMENTS
- 3 PICTURES OF PROCESS WITH CAPTIONS PER LAB/PROJECT
- INCLUDE ALL ITERATIONS OF THE DESIGN PROCESS, PROTOTYPES AND WORKING MODELS
- INCLUDE ALL DESIGN FILES AND CODE EXAMPLES
- RESOURCES AND CITATIONS
- REFLECTION OF LEARNING THROUGHOUT THE DOCUMENTATION
- CONCLUSION OF THE PROJECT/LAB
- ALL DOCUMENTATION WILL BE ONGOING AND SUBMITTED DIGITALLY

*Please include sections per required lab/project and resubmit your **total** documentation portfolio each time asked by the instructor. You may use Google Docs, Microsoft Word, Photoshop/GIMP, HTML/CSS, Github sites, Blogger, Google Sites, or any other medium that suites your needs.*
